Greece – the Euro Zone's first revolution?

SYRIZA's emergence has terrified Europe's rulers. A party which has defied austerity now commands massive support in the Greek working class. The Greek election results pose some hard questions for workers and bosses across Europe.

- Is this the end of the Euro?
- Is this a big defeat for the austerity offensive?
- Is Greece edging towards a revolutionary situation?
- What can socialists here learn from SYRIZA?
- What answers do we have to the crisis in Greece, Europe and Britain?
