Comrades*

THE IRISH REVOLUTION

AND THE

BRITISH LABOUR MOVEMENT

Geoffrey Bell

In 1916 Irish nationalists and revolutionary workers launched an insurrection against British imperialism. This was the beginning of twenty years of revolution across Europe and a struggle which left Ireland partitioned into a colonial and a neo-colonial state a few years later.

Socialist Resistance and Pluto Press are hosting this public event which is both a commemoration of an important moment in Irish working class history and an opportunity to examine the Rising's legacy and ongoing significance.
